

**HOW TO
STOP
COCKROACH
INFESTATION?**

A close-up photograph showing a person's hands using a black caulk gun to apply white sealant into a gap between a dark wood door frame and a white wall. The person is wearing a watch on their left wrist. The background is a plain white wall.

Seal all the cracks and gaps

Another reason why cockroaches are coming to your home is that you're letting them come into your home. Find out any closed space from where cockroaches are making their way into your home and seal the spaces

A photograph showing a hand reaching up towards a ceiling where water is leaking. The water is dripping down, and the hand is positioned to feel the water. The background is a plain, light-colored wall.

Fix the leakage in your home.

Due to leakage, the cockroaches find water, water leakage also creates a humid environment and cockroaches loves the humid area. They live nearby the leakage and drink water, they get their supply for free.

Cleaning the house regularly

Regular house cleaning is the key to keep cockroaches away from the house, cleaning forced cockroaches to leave the premises as there is nothing for them.

Use a strong disinfectant for cleaning your home

A strong disinfectant is what it takes to kill a cockroach. Cockroaches are highly susceptible to a good disinfectant, it kills them.
